NeuroTherm® US Office Moves to New Location

Wilmington, Massachusetts - February 9, 2009

NeuroTherm® announces the successful move of its Corporate Headquarters consisting of 41 employees including management, manufacturing, sales & marketing to a new location; 30 Upton Drive, Wilmington, Massachusetts 01887. The office was previously located in Middleton, Massachusetts.

“Our US office has more than doubled in size in the last two years and our new home accommodates our rapid expansion with state-of-the-art technology and manufacturing capabilities” said David Pierce, COO of the worldwide company.

NeuroTherm® is a leading manufacturer of radio frequency generators and related consumables used in the treatment of chronic pain. The company developed the first multi-lesion generator capable of producing multiple level lesions simultaneously; and Simplicity III, a single unit RF electrode with three active areas.

NeuroTherm now based in Wilmington also has offices in London, UK and Amsterdam, NL.
